FP-CON-VL2

### Fire Containment Bags (this applies to all Orange Preventer, Preventer MINI and Preventer HD bags)

**Storage:** Please store bags in a dry place out of direct sunlight (prolonged moisture or UV exposure can compromise bag strength). Our Fire Containment Bags are intended for a single use.

**Maintenance:** We recommend an annual inspection of your Fire Containment Bags. When conducting your inspection determine whether there are any tears or rips. Are there any signs of prolonged UV/ sunlight exposure (color fading), or signs of prolonged moisture exposure (discoloration, mildew, or mold)? If so, we recommend immediate replacement. The Usage Cycle is 12 years from the date shown on its Certificate of Conformity for all Preventer Containment Bags. The bags must be replaced at the end of the 12 year cycle.

### Smoke Containment Bags (this applies to all red Preventer Plus "S" Bags and VL2 Bags)

**Storage:** Please store bags in a dry place out of direct sunlight (prolonged moisture or UV exposure can compromise bag strength and usability). Our Smoke Containment Bags are intended for a single use.

**Maintenance:** We recommend an annual inspection on all Smoke Containment Bags. When conducting your inspection determine whether there are any tears or rips. Are there any signs of prolonged UV/ sunlight exposure (color fading), or signs of prolonged moisture exposure (discoloration, mildew, mold, or oxidization on the zipper)? If so, we recommend immediate replacement. Does the zipper close properly?

Note: Your bag ships with paraffin wax rubbed on to the zipper teeth. We recommend the bag owner repeat this annually to lubricate and

Rev H.12.5.25

protect the zipper and insure the smoothest possible operation. The Usage Cycle is 12 years from the date shown on its Certificate of Conformity for all Preventer Plus Bags. The bags must be replaced at the end of the 12 year cycle.

**Additional Information:**

**Free Replacement Bag:** Should your Brimstone Preventer, Preventer MINI, Preventer HD, or Preventer Plus bag ever be used to contain a battery fire REPLACE IT IMMEDIATELY. Brimstone will replace it for free, though some conditions do apply (contact us for details) ...

**Limited Warranty:** We offer a 1-year warranty against manufacturing defects on all products. Please contact us via email to authorize bag replacement in the event of a defect.

**Fire Containment Instructions For Use:**

Step 1: Identify Threat

Step 2: Remove Any Safety Equipment Found Within The Orange Bag

Step 3: Don Appropriate PPE (personal protective equipment)

Step 4: Place The Threat In The Orange Preventer Bag

Step 5: Hook and Loop Seal The Orange Preventer Bag

**Add Step 6 only if you have the Preventer Plus Smoke Containment Bag**

Step 6: Zip/ Seal The Orange Preventer Bag Inside The Red Zipper Bag.

Note: We recommend leaving the contained device as far from people as possible. If on board an aircraft, depending on the circumstances, it may be advisable to place the contained device on the floor as close to the outflow valve as possible.

**WARNING:** Handle overheating batteries and electronic devices at your own risk. Our Fire Containment Bags, Fire Containment Blankets, and Smoke Containment Bags are tough! They are designed to add another course of action in the event of an overheating battery. Our products are designed to greatly reduce the risk of bodily harm and property damage, but due to the unpredictable nature of battery fires, the multitude of battery types, and the possibility of human error, we cannot guarantee no harm, or damage will result when using them. Once a product has been used to contain an overheating device please order a replacement immediately.

**When Possible, We Recommend Storing Your Kit With Closure Flaps & Related Safety Equipment (Such As Gloves or Preventer Plus Bag) Inside The Orange Preventer Fire Containment Bag. If You Have Purchased An Add-On Preventer Plus Smoke Containment Bag, Always Store It With The Zipper Open.**
