

"Leading the World in Affordable, Effective Portable Foam Systems"

4039MX

"FOAM MAKER" NOZZLE

The Scotty 4039MX Medium Expansion Foam Attachment is designed to fit the Scotty 4037 Fog/Straight Stream Nozzle (1-1/2"). When sold with the 4037, it is referred to as a 4039MXPLUS. It will also fit the UFS 1575 Fog Nozzle.

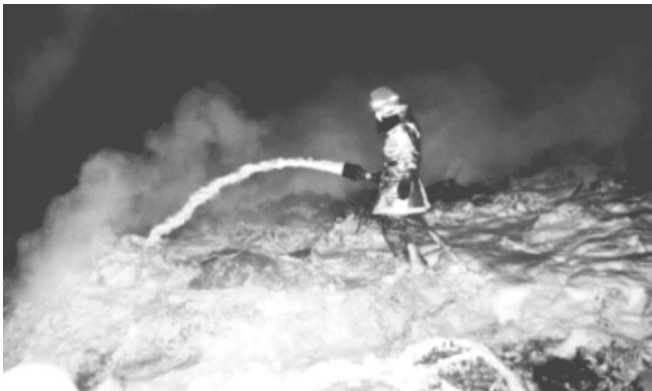

Generating a 5" (120mm) wide stream of medium expanded foam the unit can quickly lay down a foam firebreak for forest and grassland fires. For use against car fires, tire fires, hazmat applications or any situation where a thick smothering foam blanket is required. It can be used with Class A or Class B foams.

Manufactured from glass-reinforced, engineering grade nylon and stainless steel, this lightweight unit is extremely durable and is not susceptible to corrosion.

Below left is a Firefighter laying down foam at a tire fire in Tokyo, Japan.

Below right shows a foam demonstration in Queensland, Australia.
