

# Stabilisation Chocks and Blocks

Stabilisation sets made from plastic or recycled material, are prone to slipping; for superior grip, safety and overall performance, Big Red Truck, stabilisation sets are constructed from structural grade F11 Canadian Oregon for its strength and light weight characteristics.

All edges are chamfered and sanding ensuring all that sharp corners are removed. Each block is then sealed at both ends with a waterproof timber preservative to reduce splitting and extend product service life. Step chocks feature reflective markers and rope grab handles for night safety.

**Big Red Truck** use only high grade sealants and galvanised hardware during assembly. Custom kits are available upon request, refer next page.
