

# Are you serious about safety?

The Guardian 4 way RCD DUO monitors the voltage on the earth path and will isolate power if there is a fault. It can be used on a mains connected supply and also on inverter generators, UPS and invertors.

Available in single phase and 3 phase modules in both 6kA and 10kA.

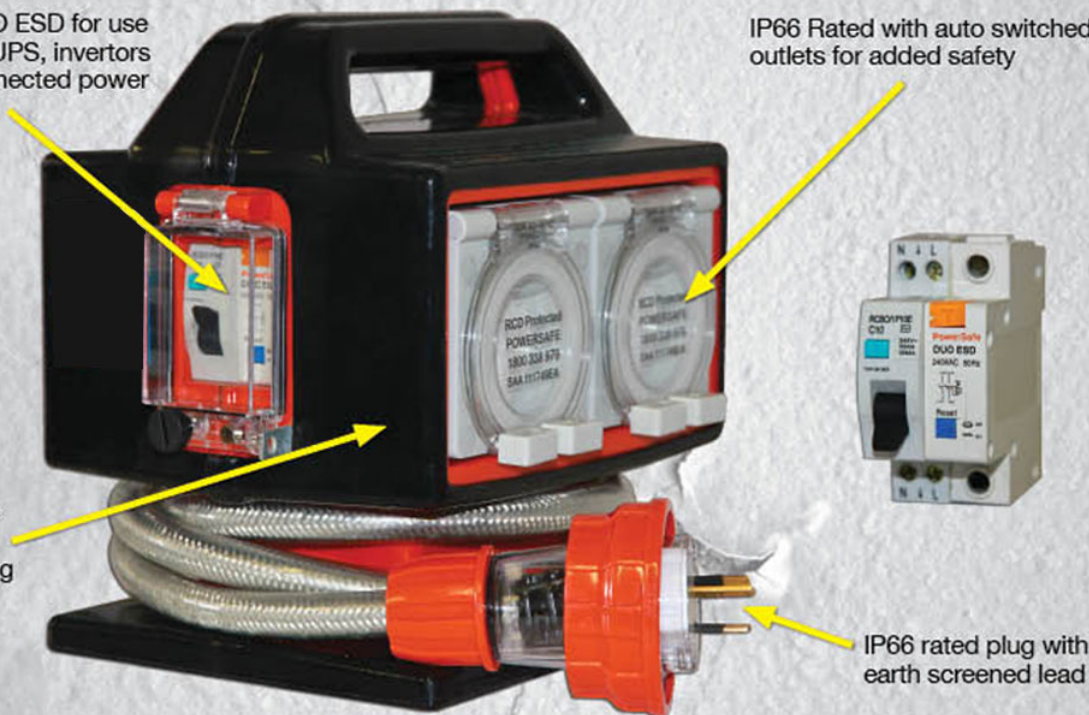

Also available in a variety of plug and play power boards

Fitted with DUO ESD for use in generators, UPS, invertors and mains connected power

IP66 Rated with auto switched outlets for added safety

Rubber boot to survive hard knocks and long life durability

IP66 rated plug with earth screened lead

This board is rated for outdoor use.
