- Sunnyflo

Cavalier Hose

Fire Hose with added protection

In environments where chemical or toxic spills may complicate fire fighting efforts, Cavalier Hose has a protective polyurethane cover on the jacket. It is a popular choice for industrial and fire fighting purposes. Apart from being an outstanding fire hose, the Cavalier is a versatile hose that is also suitable for many high and low pressure liquid transfer jobs. Cavalier is a sturdy and hardwearing layflat hose that can be easily stored when not in use. Within industrial settings, normal canvas layflat hose can be damaged by abrasions and chemical contact. Cavalier's polyurethane jacket protects the cover of the fire hose.

Features:

- mildew resistant due to its synthetic construction
- maintenance free
- ready for mounting to a fire truck or other deployment situation
- can be stored wet
- UV protection
- 12 month full replacement warranty
- Shipped complete with clamps & fittings and shut off nozzle

Colour-code your layflat hose

The protective polyurethane jacket can be manufactured in a variety of colours ideal for identification purposes. For example a red hose signifies the fire hose, while a blue hose can be for wash-down. Companies sometimes like to blend their hose colour according to the colour scheme of the plant, or to reflect their corporate colours.

Usually this hose is supplied in 30m lengths but longer lengths can be made up to 200m.

This woven fire hose is made from polyester with a synthetic rubber lining. The exterior coating on the fire hose jacket is made from polyurethane, which is essential for protecting against chemical and abrasion damage.

It is mainly used for:

- Fire fighting
- Wash-down
- Dewatering
- Water transfer

Specifications

Class	Inside diameter mm	Inside diameter inches	Working Pressure kPa	Test Pressure kPa	Burst Pressure kPa
