Sabre Hose

Fire hose for extreme fires

Sabre is Crusader Hose's **premium percolating fire hose**. This is a layflat percolating fire hose which allows precision engineered seepage of water under pressure through the hose fabric jacket. This percolating feature forms a water barrier on the hose jacket which protects the hose against the effect of heat and glowing embers.

Sabre fire hose can be manufactured from 25mm to 102 mm diameter.

It is lightweight yet sturdy construction enables fire fighters to take this fire hose into dense bushfires transporting the fire hose in backpacks. The hose is fully synthetic thus making it mildew resistant. As a result this hose is maintenance free so no drying is required after use.

Usually this hose is supplied in 30m lengths but longer lengths can be made.

All hose manufactured in our ISO 9001 quality accredited factory and comes with a standard 1 year warranty.

This woven fire hose is made from polyester with a synthetic rubber lining. The lining is mechanically perforated for even seepage along the entire length. Depending on the types of fires, you can choose from 3 grades of percolation that can be obtained - low, medium and high.

It is mainly used for:

- Forestry fire fighting
- Bush fire fighting

Specifications

Class	Inside diameter mm	Inside diameter inches	Working Pressure kPa	Test Pressure kPa	Burst Pressure kPa
M	38	1½"	1400	2100	3800
	64	2½"	1400	2100	3800
H	38	1½"	2100	3150	7500
	64	2½"	2100	3150	5300
