BULLETBLADE™

PATENT PENDING

“NEXT GENERATION TECHNOLOGY”

Turn Your Rotary Saw Into a **MULTI-PURPOSE** Saw with The **BULLETBLADE™**

The **BULLETBLADE™**

Thousands of Fire Departments have been successfully using the **BULLET®CHAIN** on Fire Rescue Chainsaws for over 25 years and now Cutters Edge has made another breakthrough by putting a **BULLET®CHAIN** on a rotary saw circular blade. The rotary saw turns the blade as much as 3 times faster than a chainsaw, significantly increasing the performance and the range of materials it can cut.

Unlike other carbide-tipped blades, the **BULLETBLADE™** can be repaired and sharpened and used over and over again, increasing the long-term value of the blade. When other blades get broken cutters or dull they cannot be repaired and are thrown away. With the **BULLETBLADE™**, the cutters can be repaired, sharpened or replaced, re-using the same blade core for a significant savings.

BULLETBLADE™ PERFORMANCE...

- Cutters Moving 3 Times Faster than a Chainsaw
- Low Vibration and Smooth, Fast Cutting
- Minimal Spark Generation

This Definitely Ain't Your Father's K-12 Anymore!

*Ventilation, Forcible Entry,
RIT, Search & Rescue,
Extrication, Aircraft Rescue
and More.*

*Will Cut Roofs, Structural
Building Materials, Various
Types and Thicknesses of
Metal, Aluminum,
Hurricane Glass, Bullet Proof Glass and Much More.*
