

AKRON

BRASS COMPANY

An ISO 9001 Registered Company

HEAVY DUTY SWING-OUT™ VALVES

- Superior Brass Construction (corrosion resistant out-lasting the cast iron pumps & apparatus)
- Flow optimization reduces turbulence while in the gated position and requires less operating force
- 316 Stainless Steel Ball for reduced breakaway torque and longer life
- Simple Two Seated Design (No O-Rings to cut or lose during assembly or maintenance)
- No lubrication or regular maintenance required
- Available in various sizes & configurations from 1" to 4"
- Cast, machined and assembled at the Akron Brass facilities in Wooster, Ohio
- Designed & tested to exceed NFPA requirements

The Akron Brass® Company has a long-standing tradition of producing high quality valves and fire fighting equipment. For over half a century, Akron Brass has been the leader in manufacturing valves for fire apparatus. Our valves have been tried and proven by thousands of firefighters all over the world. We utilize this knowledge; gained by experience and time, to continually improve our products and provide the best in fire fighting equipment to the industry.

Over 170 Different Valve Adapters Designed To Fit Nearly Every Situation
