

## Spine Boards/ Stretchers

### 71 and 71-S Basket Stretcher

The 71 Basket Stretcher is constructed of a high density polyethylene shell supported by a permanently attached heavy-duty aluminium frame. Moulded-in runners and handholds make it easy to handle. This basket stretcher is chemical, UV, rust and corrosion resistant. An easily replaceable mattress is attached inside the stretcher for patient comfort. Supplied standard with four two-piece quick release patient restraints

The 71-S two-piece Basket Stretcher has the same features as the one-piece 71 Basket Stretcher but separates in half for compact storage or backpacking to a rescue site.

### SKED Rescue Stretcher

SKED Rescue Stretcher Compact storage, ease of use and flexibility while transporting has made the SKED Rescue Stretcher popular with rescue squads, military and ski patrols. Made from a heavy sheet of plastic, the stretcher becomes rigid when folded around the patient. A variety of handles and straps assist with multiple forms of stretcher transportation including vertical and horizontal lifts with rope systems and helicopter transportation. These handles and straps also help with towing the stretcher. Sliding is made possible with the smooth bottom surface of the stretcher.

### Med Sled Evacuation

Med Sled Evacuation Be disaster prepared. When timing is critical, Med Sled Evacuation enables carers to safely transport a patient and provides the ability to control the descent down a stairwell to exit a multi floor building. No lifting is required when using the roll and drag method. Each Sled has eight handles for lifting, 3 securing cross straps and a tether and stairwell braking system. The Med Sled Evacuation rolls up and fits into the supplied compact bag with shoulder strap.
