BIG RED TRUCK

"Quality and Innovative Fire and Rescue Equipment"

Rescue LED Light System

MODEL- BRTRLSLED5K

10,000 Lumens

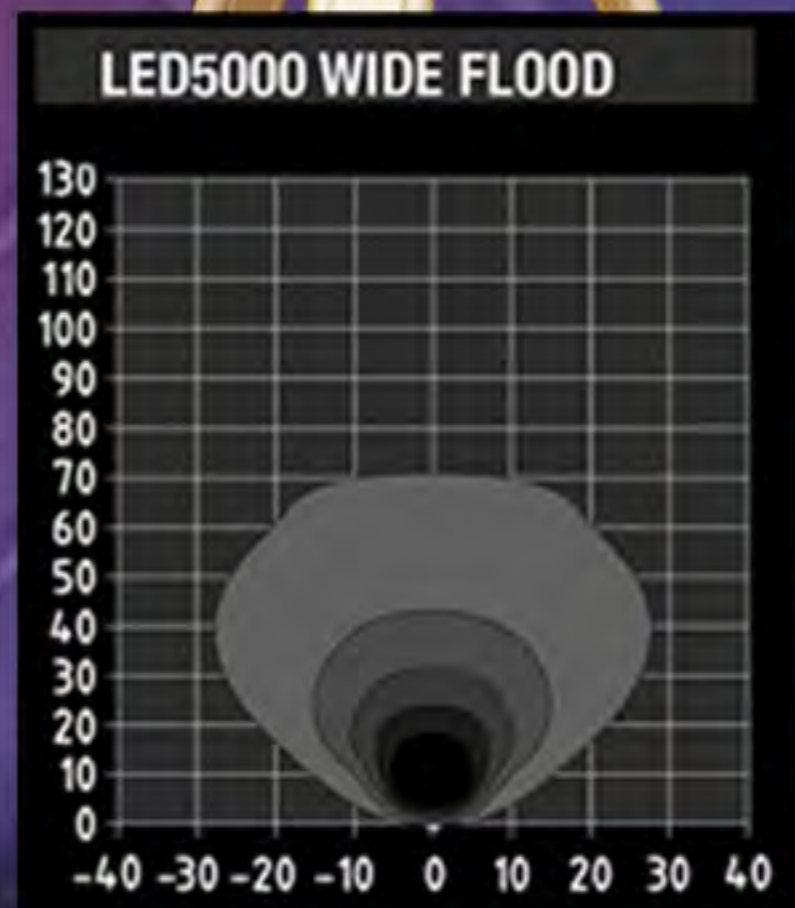

BRT has developed a solution to upgrade existing Rescue Lights with heavy duty LEDs. All LED light heads feature protected lens IP68, sealed electronics creating a superior low draw from a high output rugged work light.

The Big Red Truck 500w Halogen Rescue Light System is widely used by Emergency Services organizations across Australia. The Rescue Light System has a unique light head feature with vertical, horizontal and lateral adjustment options, designed specifically for fire and rescue applications.

The new LED upgrade kits allow the latest LED technology to be fitted to your existing light head framework eliminating the need for expensive vehicle retrofits of mounting brackets.

Mica Torch & Lightmodule Brackets Available

INCIDENT COMMAND - ICS Pro / LITE LEVEL C CASE

ICS Pro or ICS Lite hard case offer a total solution for Incident Command in one small and tough purpose made unit. Providing a quick solution that can be easily deployed and used within seconds. The ICS Pro features a single fixed whiteboard in the lid and a removable twin/double sided whiteboard. ICS Lite features a single fixed whiteboard in the lid and one fixed double sided whiteboard. Both models include microphone clips, radio/drink holders and portable stationery boards

- 12 Volt LED Light (2day burn time)
- Reinforced base for stability and strength
- Built-in tripod mount on base
- Designed for use on multiple surfaces or mounting on tripod

New Optional Accessories

- IPAD Mounting Bracket
- Iphone / Smart phone bracket

Take a Walk on the Wild Side...

Taipan Footwear Past...Present and Future

In 1962 Bill Allender began manufacturing boots in his garage at the rear of his Preston home after 40 years of gaining experience in footwear design and development. By 1972, Bill's son Russell had taken over the helm and was producing a small range of safety boots to the Australian Standard AS/NZ 2210-2 along with ankle boots for industry and the Department of Defence.

In October 1996 Highmark Shoes (Taipan®) became the first company in the world to install a Main Group machine that could produce the revolutionary DDR® (dual density rubber) moulded soles. Highmark Shoes (Taipan®) produced a range of footwear under the Taipan® label, and over the next 13 years held supply contracts with various entities including the ADF, various Police, Fire and Emergency Agencies.

Russell Allender sold the company in 2006 and retired leaving Vince Bellina and Ordi Mitkoski as owners, for approx 5 years, who then ceased trading in July 2011.

Taipan Footwear was purchased and re-established by Skyrange Footwear Pty Ltd, a partnership of both dedicated and experienced Australian Manufacturing and International Footwear Manufacturing, both of whom have a long history of successful quality and manufacturing expertise. This partnership, comprising: Kelvin Ryan, Lawrence Ryan, Wennywaty Halim, Marissa Salim, took effect on February 25, 2012 and production commenced on March 5, 2012. First orders were received on March 7, 2012 and were quickly addressed and supplied.

Taipan's made in Melbourne, are back and better than ever.

MICA NEW RELEASE LED IL600 AND 6000GT TORCHES

Mica Elektro Oy Ltd. is a leading manufacturer of portable lighting for professional use since 1983. Reliability, up-to-date certification and user friendly operation are our main goals.

LIGHTMODULE LMPRO

Proudly Made in the 

LMPRO

Designed and manufactured by Lightmodule in the United States, LMPRO is an award-winning professional line of portable utility light systems featuring the brightest electronic flare ever made.

Manufactured from high quality military components the LMPRO can transform from a flare into a powerful area light or 3-in-1 combo unit in a matter of seconds. Portable, versatile, rechargeable and built to withstand tough conditions, LMPRO is all about keeping people safe and was specifically designed to be used within aviation, emergency services, the industrial sector, mining, police, security, transport, rail, and outdoor recreational situations where extreme brightness for increased safety is required.

Light Head

Battery

Benefits of LMPRO include:-

- Up to 16 hours light per charge
- LEDs rated to last 100,000 hours of on time
- 360 degree pattern
- Water resistant
- Visible up to 8kms
- 5 year LED head warranty

pharobit
PAF-100

Saves Lives

The PAF-100 is a Distress Signal Unit (DSU) also known as Personal Alert Safety System (PASS) designed to protect firefighters and rescue personnel. Featuring the latest digital technology, the PAF-100 is the most valuable tool for recognizing a downed firefighter.

Features

- 10 watt CREE LED with five light modes including SOS
- 3 Stage Siren (96db)
- Equipped with Fog and Smoke Filter
- In built Break Glass Tool
- Battery Life Indicator

Today's most technically advanced LED personal alert safety system

COVEX

Vehicle Stabilisation

This New Generation Stabilisation system has been developed to stabilise in a quick and secure way. The quick – lock system makes it possible to adjust the strut quickly to any chosen length. This gives an infinitely variable height setting and any position is possible. The Covex Stabilisation system consists 2 stabilisation legs.

Covex Stabilisation system is applicable on cars, mpv's, vans and even truck cabins. In any position facing any surface. The system uses it's own mass to stabilise the vehicle. After stabilising, the rescue operation can proceed without any movement of the vehicle involved. The stabilised vehicle gives a safe environment for both victims and rescue workers.

Hot Stick - High Sensitivity AC Voltage Detector

The AC HotStick is a safety device designed for professional rescuers which provides warning of exposed high voltage AC from a safe distance. The AC HotStick will give early audible (“beeping”) and visual (flashing LED) warning of the presence of dangerous voltages without the need to contact the surface carrying the current. The closer the user comes to the source of the voltage, the more rapidly the unit beeps and flashes.
