READ THIS.... IT COULD SAVE YOUR LIFE!

How safe is your generator?

"Most portable generators are not fitted with an RCD DUO"

Question: Does the safety switch (RCD) on your generator protect **you**?

Answer: No, not in all situations.

Reason: Electricity flows to earth (ground) by the least path of resistance. This is critical especially if the user is in a wet or damp environment.

A safety switch needs to be connected to a tested earth spike that has less resistance than a human body. If a generator is mounted on a vehicle it remains insulated from the earth. This scenario makes a safety switch useless. An RCD requires a tested earth spike to operate correctly.

Solution: The Big Red Truck PowerSafe RCD DUO.

This safety device offers protection regardless of the earthing environment by combining a standard safety switch with an Earth Sensing Device (ESD). The ESD operates in a compromised earth environment by monitoring voltage and current on the earth circuit. The DUO then isolates power in the event of an electrical fault.

IS YOUR GENERATOR REALLY SAFE TO USE IN AN EMERGENCY WORKPLACE ENVIRONMENT?

Solution - RB4 DUO Power Board

**5 Year
Warranty**

This portable power board is fitted with the RCD DUO, combining a standard safety switch with an Earth Sensing Device offering protection on all power sources regardless of the earthing environment.

- 1 x 1.8m earth screened lead with 15amp IP66 plug
- 1 x 15amp 2 pole 6kA DUO Earth Safety Device
- 4 x 15amp 240V IP66 auto switched outlets

PowerSafe IP66 Earth Braided Extension Leads

Traditional extension leads provide limited protection in hazardous environments.

It is possible for lead be cut across the active and neutral wires and totally miss the earth. The earth wire is critical to ground a fault and activate a safety switch.

What makes a braided power lead different is the addition of a tinned copper braid encasing the cable which is integrated to the earth wire.

What are the advantages of using braided extension leads?

- Braid sheath permanently connected to the earth wire.
- Ensures safety devices activates when lead is damaged.
- Braid offers higher mechanical protection.
- IP66 Plugs ensure safer operation in wet environments.

REMOTE AREA-SPOT LANTERN

**12° Spotlight +
120° Area Light**

Dimensions

- Weight - 1.9kg
- Width - 110mm
- Depth - 133mm
- Height - 222mm

Remote Control

- Up to 12m away!

Light Output / Runtime

- High: 2,500 Lumens - 3 hours
- Medium: 850 Lumens - 9 hours
- Low: 400 Lumens - 24 hours

Battery

- Rechargeable lithium-ion 80 WH battery
- Fully recharges in 4 hours; 500+ charge cycles

Durability

- 6061 T6 aluminium head & polycarbonate lens
- Meets NFPA 1971-2001 standards

TACTICAL TORCH GCF-200

World's First! High Luminance LED torch with unique built-in features:

- Full HD Video Recorder
- GPS Map
- Night Vision
- Waterproof to 100m

MERCURY QUICK ATTACK MONITOR

The 'Mercury Quick Attack' is a compact, lightweight portable monitor which widely used by fire departments and emergency services throughout Australia.

Akron have designed this monitor with quick deployment in mind and better ground stability to enable flow rates to flow up to 1900lpm.

- Rotation + - 20°
- Elevation 30° to 60° unmanned
- Down to 20° when manned
- Integrated Stream Shaper
- 64mm Inlet and Outlet

QLD DRAFT POLICY ON FIRE FIGHTING FOAMS

Early in 2014, Queensland Department of Environment and Heritage Protection released its Draft Policy on 'Management of Fire Fighting Foams'.

What does this mean to mines and industry?

- Fluorochemicals found in AFFF's, FFFP's and Fluoroprotein foams pose very significant risks to the environment through their extreme persistence, bioaccumulation potential and toxicity.
- Use of foams that contain the fluorinated organic compounds (PFOS and PFOA or any compound that degrades or converts to those Compounds) are not to be used, on-sold, traded or otherwise provided to any person other than for the purposes of proper disposal - **must be withdrawn from service immediately and managed as a regulated waste.**
- Any use of fluorinated foams must be fully and completely contained.

What is the solution for mines and industry?

Answer: Fluorine-Free - Solberg RF Re-Healing™ Class B and Solberg Fire-Brake Class A Foams.

QLD Fire and Emergency Services, NSW Fire and Rescue Services, Melbourne Fire Brigade and Air services Australia (21 major airports in Australia) are just a few who have converted over to the Solberg RF RE-HEALING™ Foams due to its high fire performance and the environment.

Certification: EN1568 Approved, UL162 Standard Listed; ICAO Certified; LASTFire; USFS - QPL.

Speak with BRT for future information and product clarification.

NEW PRODUCT TAIPAN Footwear

Traditional elastic sided work wear fire boots with wildland classification type 1, have been added to Taipan Footwear range.

Featuring both steel cap and soft toe antistatic boots with dual density rubber soling which reduces foot and leg fatigue, therefore less strain on your back and knees!

Style # 3070 Steel Cap -
AS/NZS 2210.3:2009

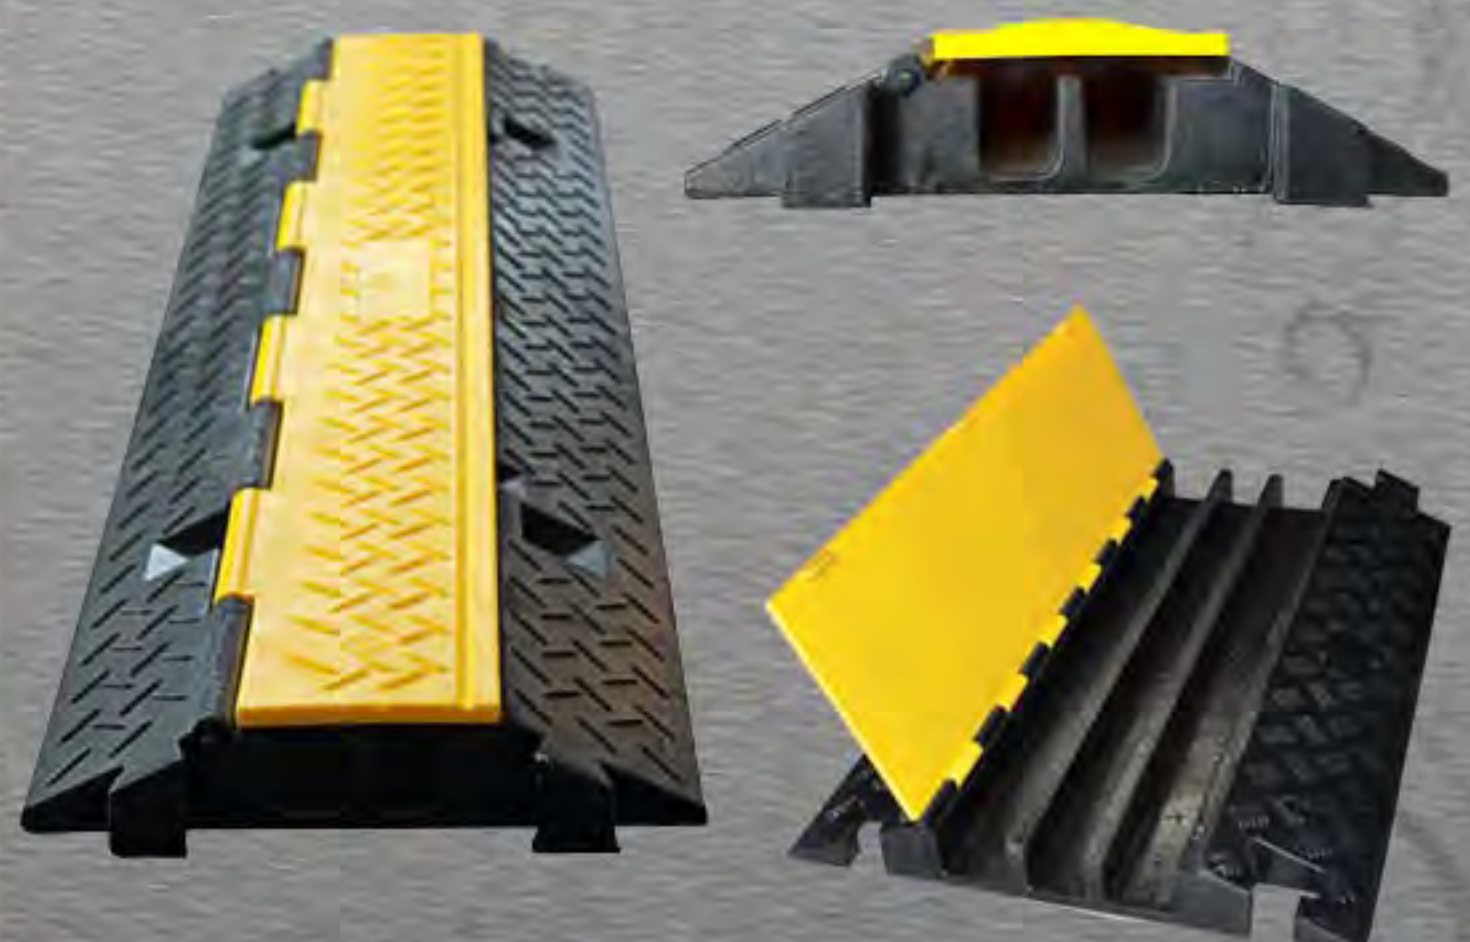

Style # 3071 Soft Toe

POWER SAFETY COVERS

Heavy Duty Cable Covers are designed to reduce the trip hazard risk while protecting your valuable cable and hoses from traffic damage.

For use on roadways and pedestrian areas, they allow heavy vehicles to drive over cables and hoses without causing damage.

2 Channel and 3 Channel Covers Available

BIG RED TRUCK

INCIDENT COMMAND SYSTEMS®

FOLDERS (LEVEL A)

Incident Command System (ICS) A4 and A5 Level A folders provide a compact compendium for personal use and all the basic tools in one simple to read layout. Fully compatible with larger ICS kits.

Features:

- Clip board
- Open layout
- Pen holders
- Multiple storage pockets
- Removable T-card holder
- Internal / External clear storage pockets
- Available in A4 and A5 formats

SOFT BAGS (LEVEL B)

Incident Command System (ICS) Soft Bag with double sided white board are suitable for larger incidents however have a compact design.

Features:

- Heavy duty double sided Omniplate™ white board
- Pen and white board marker
- Removable T-card Holders
- Multiple storage pockets
- Agency magnets included
- Custom labelling
- Compact size

BANNERS (LEVEL D)

Supplied with eyelets, cord and storage container.

D5 = 100 T-Cards

D8 = 160 T-Cards

HARD CASES (LEVEL C)

ICS PRO

ICS PRO provides a total solution in one small tough purpose made ICS hard case unit allowing a quick solution that can easily be deployed within seconds. These Incident Command Cases provide the ICS controller with all the tools necessary in a matter of seconds.

ICS LITE provides a lightweight solution without sacrificing durability and strength. ICS LITE features are the same as the ICS PRO with the exception of the double sided removable white board. ICS LITE has a fixed double sided white board.

ICS PRO and LITE features:

- Radio holders
- Drink holder
- LED lighting

Optional Extras:

- Tablet / phone brackets
- Customised labelling
- Location flags

ICS LITE
