

## NSP-2422B

### Polymer Non-Rechargeable Dual-Light with Magnet

#### MARKET APPLICATIONS

Industrial, Automotive, Sporting Goods, Public Safety & Military

#### DESCRIPTION

The Nightstick NSP-2422B Dual-Light uses a CREE® LED rated at 130 lumens paired with a high-efficiency deep parabolic reflector, creating a flashlight beam with an effective range of 181 meters (over 590 feet). Additionally, built into the handle is a 110 lumen floodlight. Unlike the flashlight beam, the light coming out of the floodlight does not have a reflector so the light spreads out in a wide, even, unfocused pattern of light...perfect for lighting up things that are close. Additionally, both the flashlight and the floodlight can be turned on at the same time for even more versatile lighting options. The integrated magnet located in the base of the handle, provides for almost limitless hands-free usage.
