

Vallfirest - Wildland Fire Helmet VF2

VAL1.VF2.YEL

The new wildland fire helmet VF2 with Standard EN16471, EN16473, EN 12492, EN 397 and EN 443 has been designed to meet the needs of entities taking action in forest fires, providing a high level of protection and versatility with a multitude of accessories, and a modern, differentiated aesthetic image.

Moulded from high strength polycarbonate the VF2 shell offers superior protection and balanced lightweight comfort. An innovative magnetic locking chin strap secures the three point chin harness to the shell.

VF2 caters for a wide range of head sizes from XS to XL. The fully suspended adjustable EPS head harness features a durable breathable padded fabric offering the best wearer comfort available in today's market. VF2 can be easily adjusted by a gloved hand without the use of tools or need to remove the helmet or gloves.

Features:

- Full perimeter protective brim
- high strength polycarbonate shell
- unique colour code brim combinations
- one size fits all adjustable harness XS to XL
- available range of shell and brim colours
- exclusive magnetic locking 3-point chin strap
- fully suspended adjustable head harness
- breatheable padded washable fabric
- complies with AS/NZ 1801 Type 3
